PROFESSIONAL SUMMARY

Software Developer Intern at CormSquare and final-year B.E. student, developing enterprise web applications with ASP.NET Core Web API, Angular and SQL Server. Hands-on experience building REST APIs, e-commerce cart and checkout features, and data access with Entity Framework Core, using Git and GitHub Actions CI/CD workflows. Seeking Software Developer, Full Stack Developer or Software Engineer roles in Bengaluru.

EDUCATION

B.E. in Electronics and Communication Engineering | Global Academy of Technology, Bengaluru **2023 – 2027**
CGPA: 8.59 / 10

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, SQL, HTML5, CSS3; Java and Python (foundational)
Backend: ASP.NET Core (Web API, MVC, Razor Pages), REST APIs, Entity Framework Core (Code-First, Migrations), Repository Pattern
Frontend: Angular, TypeScript, JavaScript, HTML5, CSS3
Database: SQL Server, SQL Query Writing and Analysis, Dynamic Management Views (DMVs)
Tools & DevOps: Git, GitHub, GitHub Actions (CI/CD), Visual Studio, VS Code, Swagger, ServiceNow
API & Testing: Postman, End-to-End Application Testing, Workflow Validation, Test Documentation
Fundamentals: Data Structures and Algorithms, Object-Oriented Programming (OOP), DBMS

EXPERIENCE

Software Developer Intern | CormSquare **Jan 2026 – Present**

- Develop and maintain ASP.NET Core Web APIs and Angular modules for enterprise web applications, including e-commerce cart and checkout features.
- Write and execute SQL queries and implement data access using SQL Server and Entity Framework Core.
- Analyse SQL query performance and application behaviour using Dynamic Management Views (DMVs), following company security policies.
- Use Git, GitHub and GitHub Actions CI/CD workflows for source control and build and deployment automation.
- Test and validate REST APIs using Postman and Swagger; perform end-to-end application testing by executing complete transactions and validating workflows.
- Identify application issues during product testing and collaborate with development and testing teams to resolve them.
- Prepare technical and functional documentation and testing records of executed transactions, observations and results to support issue tracking and team review.
- Assist with ServiceNow service desk tickets, supporting issue investigation, updates, follow-ups and ticket closure.

PROJECTS

SQL Server Performance Monitoring & Analytics Dashboard | ASP.NET Core Web API, Angular, SQL Server, DMVs

- Built a performance monitoring dashboard that queries DMVs to identify slow-running SQL queries, using an ASP.NET Core Web API backend and Angular frontend.
- Designed REST APIs with pagination and date-range filtering for large datasets; stored query statistics over time for historical performance tracking.

Full-Stack E-Commerce Web Application | ASP.NET Core Razor Pages, EF Core, SQL Server

- Developed a full-stack application using the Repository pattern and designed a six-entity relational schema with EF Core Code-First migrations.
- Implemented product and category management, cart, checkout, user authentication, admin CRUD for products, categories and orders, and an admin dashboard.

Health Monitoring & Remaining Life Estimation of Second-Life Li-Ion Batteries | ESP32, INA219, DS18B20, Firebase

- Developed an IoT system to monitor battery voltage, current and temperature using an ESP32 with INA219 and DS18B20 sensors, integrated with Firebase.
- Implemented State of Health (SOH) classification (Healthy ≥80%, Second-Life Candidate 50–79%, End-of-Life <50%) and Remaining Useful Life (RUL) estimation; built a web dashboard using HTML, CSS and JavaScript with LED indication.

UNI RIDE – Web-Based Carpooling & Ride-Sharing Platform | HTML, CSS, JavaScript

- Developed a carpooling and ride-sharing web application as part of a team project using HTML, CSS and JavaScript.
